

LUBRICAST PRO-SHOT 429

DIE CASTING DRY PLUNGER LUBRICANT

▶ PRODUCT DESCRIPTION

Lubricast Pro-Shot 429 is a graphited, solid wax based lubricant specially formulated for plunger lubrication. Although application requirements may vary from process to process, a general rule is 1/2 gm of pellets per inch of tip. Lubricast Pro-Shot 429 will significantly clean up the shot-end of any cold chamber die cast machine and contribute to lower maintenance costs.

▶ FEATURED BENEFITS

- Consistent shot-to-shot profile and increased plunger tip and sleeve life
- Increased quality productivity from reduced porosity from decreased out-gassing
- Reduced flame and smoke and housekeeping costs
- Improved plant working environment

APPLICATION

TYPICAL PROPERTIES

Shape	Small, round pellets
Color	Gray
Size	4 to 9 mesh size, 2200-4800 µm

PRODUCT CODE

1111800000
