

RUST RID DUO A (READY TO USE)

NEUTRAL PH RUST STRIPPER SYSTEM

▶ PRODUCT DESCRIPTION

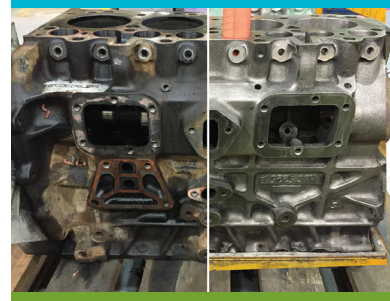

Rust Rid Duo A (Ready to Use) is a uniquely formulated two package water based rust stripper with a near neutral pH. Rust Rid Duo A Ready to Use is ideally suited for removing rust on cast iron alloys, tool steels and all carbon steels. It is slightly less effective on stainless steel alloys. The product is most effective against surface and blush rust.

Rust Rid Duo A is composed of two products, namely Rust Rid Duo A Ready to Use (400020), and Rust Rid Duo Inhibitor Ready to Use (520040). These two products are used sequentially in the hand spray application process. Rust Rid Duo A Ready to Use is used as supplied to remove rust, and Rust Rid Duo Inhibitor Ready to Use is used after rust removal to prevent re-rusting. Note: For best results it is recommended that Rust Rid Duo A Ready to Use be sprayed on the part, kept wet for 10-15 minutes (DO NOT ALLOW TO DRY), and, if needed, some mechanical action (brass brush) may be used, dependent upon the severity of the rust. Once rust removal has been completed, the part should optimally be rinsed or at least wiped dry. After rinsing or wiping, Rust Rid Duo Inhibitor Ready to Use should be immediately and liberally applied and allowed to dry on the part.

▶ FEATURED BENEFITS

- Neutral pH in the working bath for easy handling and worker health and safety piece of mind
- No heavy metal ingredients

APPLICATION

COMPATIBLE METALS

Cast Iron
Carbon Steel
Tool Steel
Stainless Steel

APPLICATION METHOD

Spray

OPERATING TEMPERATURE

Ambient – 160°F (71°C)

RUST RID DUO A (READY TO USE)

TECHNICAL DATA

TYPICAL PROPERTIES – RUST RID DUO A READY TO USE

Fluid Type	Water based/slightly acidic
Appearance	Water white to light straw liquid
Specific Gravity	1.076
Weight, lb/gal.	8.96
pH (concentrate)	6.5

TYPICAL PROPERTIES – RUST RID DUO INHIBITOR

Fluid Type	Water based/slightly acidic
Appearance	Water white to light straw liquid
Specific Gravity	1.05
Weight, lb/gal.	7.85
pH (concentrate)	8.6

PRODUCT CODE

Rust Rid Duo A Ready To Use	4000200000
Rust Rid Duo Inhibitor Ready To Use	5200400000
