

SEAL COMPATIBILITY WITH UCON™ QUENCHANTS

In most conversions from either water, oil and/or other quenching fluids, the question of seals always should be an important factor. The use of leather or cork based products is definitely unacceptable.

The generally acceptable seal material, used with UCON™ Quenchants, is as follows:

- Viton – (Dupont Product) – Parker Seal
- Neoprene
- EPDM
- Nitrile
- Buna N
- Buna H
- Buna S
- Butyl
- Silastic
- Natural Rubber
